CONTENTS

FOREWORD.....	5
1 Scope.....	7
2 Normative references	7
3 Conditions for measurement.....	8
3.1 General conditions	8
3.2 Measuring conditions	8
4 Test signals.....	9
4.1 General.....	9
4.2 Sinusoidal signal	9
4.3 Broadband noise signal	9
4.4 Narrow-band noise signal	9
4.5 Impulsive signal	9
5 Acoustical environment	9
5.1 General.....	9
5.2 Free-field conditions.....	10
5.3 Half-space free-field conditions	10
5.4 Diffuse sound field conditions.....	10
5.5 Simulated free-field conditions	10
5.6 Half-space simulated free-field conditions	11
6 Unwanted acoustical and electrical noise	11
7 Positioning of loudspeaker and measuring microphone.....	11
7.1 Measuring distance under free-field and half-space free-field conditions	11
7.2 Positioning of loudspeaker in diffuse field conditions	11
7.3 Positioning of loudspeaker and microphone in simulated free-field conditions	12
8 Measuring equipment	12
9 Accuracy of the acoustical measurement.....	12
10 Mounting of loudspeakers.....	12
10.1 Mounting and acoustic loading of drive units	12
10.2 Mounting and acoustic loading of a loudspeaker system.....	13
11 Standard baffle and measuring enclosures	13
11.1 Standard baffle.....	13
11.2 Standard measuring enclosures	13
12 Preconditioning	14
13 Type description.....	14
13.1 General.....	14
13.2 Loudspeaker drive units	14
13.3 Loudspeaker system	14
14 Marking of terminals and controls	15
14.1 General.....	15
14.2 Positive terminal.....	15
15 Reference plane, reference point and reference axis	15
15.1 Reference plane – characteristic to be specified.....	15
15.2 Reference point – characteristic to be specified.....	15
15.3 Reference axis – characteristic to be specified	16

16	Impedance and derivative characteristics	16
16.1	Rated impedance – characteristic to be specified	16
16.2	Impedance curve	16
16.3	Total Q-factor (Q_t)	16
16.4	Equivalent air volume of a loudspeaker drive unit compliance (V_{as})	18
17	Input voltage	19
17.1	Rated noise voltage	19
17.2	Short-term maximum input voltage	20
17.3	Long-term maximum input voltage	20
17.4	Rated sinusoidal voltage	21
18	Input electrical power	21
18.1	Rated noise power – characteristic to be specified	21
18.2	Short-term maximum power – characteristic to be specified	22
18.3	Long-term maximum power – characteristic to be specified	22
18.4	Rated sinusoidal power – characteristic to be specified	22
19	Frequency characteristics	22
19.1	Rated frequency range – characteristic to be specified	22
19.2	Resonance frequency	22
19.3	Tuning frequency of a bass reflex or passive radiator loudspeaker system – characteristic to be specified	22
20	Sound pressure under free-field and half-space free-field conditions	23
20.1	Sound pressure in a stated frequency band	23
20.2	Sound pressure level in a stated frequency band – characteristic to be specified	23
20.3	Characteristic sensitivity in a stated frequency band	23
20.4	Characteristic sensitivity level in a stated frequency band – characteristic to be specified	24
20.5	Mean sound pressure in a stated frequency band	24
20.6	Mean sound pressure level in a stated frequency band – characteristic to be specified	24
21	Response under free-field and half-space free-field conditions	24
21.1	Frequency response	24
21.2	Effective frequency range	25
21.3	Transfer function	26
22	Output power (acoustic power)	27
22.1	Acoustic power in a frequency band	27
22.2	Mean acoustic power in a frequency band	28
22.3	Efficiency in a frequency band	28
22.4	Mean efficiency in a frequency band	28
23	Directional characteristics	29
23.1	Directional response pattern	29
23.2	Radiation angle	30
23.3	Directivity index	30
23.4	Coverage angle or angles	31
24	Amplitude non-linearity	32
24.1	Total harmonic distortion	32
24.2	Harmonic distortion of the n^{th} order (where $n = 2$ or $n = 3$)	33
24.3	Characteristic harmonic distortion	35

24.4	Modulation distortion of the n^{th} order (where $n = 2$ or $n = 3$).....	35
24.5	Characteristic modulation distortion of the n^{th} order (where $n = 2$ or $n = 3$)	36
24.6	Difference frequency distortion (of the second order only)	36
25	Rated ambient conditions	37
25.1	Temperature ranges	37
25.2	Humidity ranges	37
26	Stray magnetic fields	37
26.1	Static components	38
26.2	Dynamic components	38
27	Physical characteristics	39
27.1	Dimensions	39
27.2	Mass	39
27.3	Cable assemblies	39
28	Design data	40
29	Indication of the characteristics to be specified	40
Annex A (informative)	Standard measuring enclosure type A	46
Annex B (informative)	Standard measuring enclosure type B	48
Annex C (informative)	Definitions of terms used in Clause 13	51
Annex D (informative)	Listening tests	53
Bibliography	53
Figure 1	– Impedance curve of loudspeaker.....	17
Figure 2	– Standard baffle, dimensions	42
Figure 3	– Standard baffle with chamfer.....	43
Figure 4	– Standard baffle with sub-baffle.....	43
Figure 5	– Standard measuring enclosure type A	44
Figure 6	– Standard measuring enclosure type B	44
Figure 7	– Block diagram of test set-up.....	45
Figure 8	– Measuring apparatus for stray magnetic field	45
Figure A.1	– An example of standard measuring enclosure type A	46
Figure A.2	– The correction curve for the diffraction effect of the standard measuring enclosure from free-field to half-space free-field	47
Figure A.3	– The correction curve for the diffraction effect of a standard measuring enclosure from free-field to half-space free-field	47
Figure B.1	– An example of standard measuring enclosure type B	48
Figure B.2	– Construction of scalable measuring enclosure type B	49
Figure B.3	– The correction curve for the diffraction effect of the standard measuring enclosure from free-field to half-space free-field	50
Figure B.4	– The correction curve for the diffraction effect of the standard measuring enclosure from free-field to half-space free-field	50
Table 1	– Indication of the characteristics to be specified	41
Table B.1	– Dimensions and ratios of scalable enclosure type B	49

INTERNATIONAL ELECTROTECHNICAL COMMISSION

SOUND SYSTEM EQUIPMENT –**Part 5: Loudspeakers****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60268-5 has been prepared by IEC technical committee 100: Audio, video and multimedia systems and equipment.

This consolidated version of IEC 60268-5 consists of the third edition (2003) [documents 100/648/FDIS and 100/674/RVD] and its amendment 1 (2007) [documents 100/1189/CDV and 100/1245/RVC].

The technical content is therefore identical to the base edition and its amendment(s) and has been prepared for user convenience.

It bears the edition number 3.1.

A vertical line in the margin shows where the base publication has been modified by amendment 1.

This standard is to be read in conjunction with IEC 60268-1, IEC 60268-2 and ISO 3741.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of the base publication and its amendments will remain unchanged until the maintenance result date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual edition of this standard may be issued at a later date.

SOUND SYSTEM EQUIPMENT –

Part 5: Loudspeakers

1 Scope

This standard applies to sound system loudspeakers, treated entirely as passive elements. Loudspeakers with built-in amplifiers are excluded.

NOTE 1 The term “loudspeaker” used in this standard relates to loudspeaker drive units themselves and also to loudspeaker systems, which comprise one or more loudspeaker drive units provided with a baffle, enclosure or horn and such relevant devices as built-in crossover filters, transformers and any other passive element.

The purpose of this standard is to give the characteristics to be specified and the relevant methods of measurement for loudspeakers using sinusoidal or specified noise or impulsive signals.

NOTE 2 The methods of measurement given in this standard have been chosen for their appropriateness to the characteristics.

NOTE 3 If equivalent results can be obtained using other methods of measurement, details of the methods used should be presented with the results.

NOTE 4 The following items are under consideration:

- loudspeakers with built-in amplifiers;
- measurements under conditions other than free-field, half-space free-field and diffuse field;
- measurements with signals other than sinusoidal or noise or impulsive signals.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60050(151), *International Electrotechnical Vocabulary (IEV) – Part 151: Electrical and magnetic devices*

IEC 60263, *Scales and sizes for plotting frequency characteristics and polar diagrams*

IEC 60268-1, *Sound system equipment – Part 1: General*

IEC 60268-2, *Sound system equipment – Part 2: Explanation of general terms and calculation methods*

IEC 60268-3, *Sound system equipment – Part 3: Amplifiers*

IEC 60268-11, *Sound system equipment – Part 11: Application of connectors for the interconnection of sound system components*

IEC 60268-12, *Sound system equipment – Part 12: Application of connectors for broadcast and similar use*

IEC 60268-14, *Part 14: Circular and elliptical loudspeakers; outer frame diameters and mounting dimensions*

IEC 60651, *Sound level meters*

IEC 61260, *Electroacoustics – Octave-band and fractional-octave-band filters*

ISO 3741, *Acoustics – Determination of sound power levels of noise sources using sound pressure – Precision methods for reverberation rooms*

ISO 3744, *Acoustics – Determination of sound power levels of noise sources using sound pressure – Engineering method in an essentially free field over a reflecting plane*

ISO 3745, *Acoustics – Determination of sound power levels of noise sources – Precision methods for anechoic and semi-anechoic rooms*
